Carnival Studio Theater

The Carnival Studio Theater (CST) is the Center's most versatile space. The 60' x 70' flexible black box has an aircraft cable grid suspended at approximately 21' above the deck, which provides access to rigging/hanging points and lighting positions. The CST hosts theater and dance productions from around the world, and perhaps most importantly, it gives local artists a first-class venue where their work can be developed, tested and exhibited to a wide audience.

****Please Reference: [PDF Ground Plan & Light Grid Drawing](#)**

Labor

The Center holds a collective bargaining agreement with the International Alliance of Theatrical Stage Employees (I.A.T.S.E). CST Department Heads and any additional stagehands called to work in the theater are members of I.A.T.S.E. Local 500. House equipment, including but not limited to personnel lifts, lighting consoles, sound consoles, stage lifts, fly systems and canopies will be operated by an Arsht Center Department Head or a stagehand designated by the venue Steward.

Fire Safety

City of Miami Fire

City of Miami Fire Rescue Inspectors are contracted for any performance or event that uses open flame, smoke, haze or pyrotechnic effects. **Fire Watch requests should be provided as part of the advance, and should be submitted to Production *no later than four(4) weeks before the date of the event.***

Seating

Telescopic seating risers enable presenters to create varying theater or cabaret seating configurations with a seating capacity of up to 225. These include proscenium, alley, thrust and arena style seating arrangements.

**** Please Reference: [List of Various Seating Arrangements](#)**

Loading Dock

The entrance to the loading dock is located on Northeast 14th Street between Biscayne Boulevard and Northeast 2nd Ave. Trucks should approach the docks coming from Northeast 2nd Ave to turn eastbound onto Northeast 14th street. There is a small, gated dock that leads directly to the Carnival Studio Theatre and can accommodate no more than a 20ft truck or trailer. However, there are 4 additional bays that can accommodate full-sized 53' trailers located in the same venue. These bays are available upon request pending performances in the Ziff Ballet Opera House; which houses the 4 large bays. All the loading bay doors in the building are fully sheltered from the weather and are level with the dock's height (therefore, no forklift is needed).

Stage Door

The Stage Door is located at the intersection of Northeast 2nd Avenue and Northeast 14th Street. For safety and security of guests and staff, anyone working or visiting the Ziff Ballet Opera House Lynn Wolfson Stage, Carnival Studio Theater or Peacock Foundation Studio is required to check in with Security at this entrance, without exception. Those not having proper identification and authorization will be denied entry and asked to leave. Once checked in, you will be allowed entry to the dock.
